

Breakout Group 1

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Wildfire

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- backpack in case of emergency
- In Castro Valley don't feel it's a threat except for smoke
- have evacuation plan and have offered training for residents
- backpack w/ water, making sure there is fuel in car
- have own gravity shed water storage system

In what ways do you feel unprepared?

- need to know evacuation routes
- lack of fire insurance is concern - people's policies getting cancelled frequently
- concerns re: undeveloped / brushy areas, have to take care of it in summer
- concerns esp. with proximity to Lake Chabot

Extreme Heat

How prepared do you feel to deal with the impacts of this climate hazard?

in bay area haven't experience extreme heat, but inland they have

What makes you feel prepared?

- feel prepared in home: Trees + ceiling fans, closing/opening drapes
- house is well-insulated, as long as there is cool evening it's ok
- electrifying house - removing gas furnace, but unsure if this will help extreme heat
- house and backup generator system

In what ways do you feel unprepared?

- county's anti-tree ordinance
- the more people w/ AC the better
- most people don't have AC, it often doesn't cool down at night in extreme heat
- concerns for cattle w/o shade, esp. for young calves
- lack of cell service in sunol
- lack of trees - still are brown from last year
- many older people don't have a plan or AC
- slow downs with public transit

Flooding

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- vegetation in yard soaks it in
- does not seem as much as threat on hayward/castro valley border
- not as many individual home concerns
- no big trees to fall over, however this is concern in other areas

In what ways do you feel unprepared?

- everyone on septic system, unsure what to do when floods
- caltrans unresponsive to clearing debris
- dublin increase in housing causing more run off - creating issues downstream
- crow canyon road - freeways damaged recently, infrastructure/transit threatened
- loosening of soil from heavy rain
- redwood road fell apart, road closures are bad
- soil erosion / road damage
- do we know ahead of time where roads may be damaged? was damage location predicted?
- only so much individual action possible - county/state action needed
- work with EBMUD for more education
- there are many ways to recycle water - need more statewide
- people still buy plastic water bottles
- concern about need to buy water from elsewhere
- hope for education from county re: how critical water is
- need water for grass to feed cattle - need to buy alternatives when it runs out
- regardless of household conservation efforts, requires coordinated action by county/state/even interstate
- many oaks are already bare branches - concern re: more tree loss
- this is one of our biggest problems
- this is major threat - despite native plant gardening efforts, many still have water intensive lawns
- there's nothing you can do about lack of water, handled poorly historically

Drought

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- grew up with well access, continue to use this
- native plants in yard
- wells for house / cattle
- greywater training / resources

In what ways do you feel unprepared?

Breakout Group 2

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

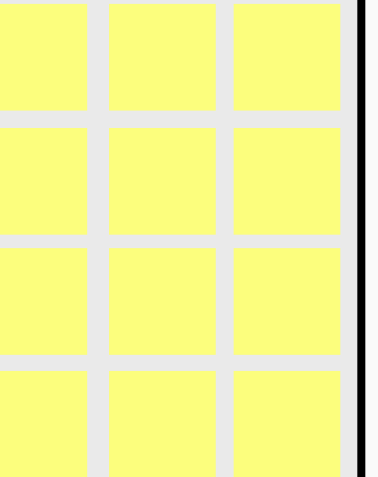

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Wildfire

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- Utility companies undergrounding utility lines
- Removing overgrown vegetation
- Effective mitigation already in place and planned
- More investments in fire fighting
- Last summer impacts were less than previous summer

In what ways do you feel unprepared?

- More intense wildfires
- No control over smoke impacts
- Preparing children in addition to yourself

Extreme Heat

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- Has a generator, works in air conditioned building

In what ways do you feel unprepared?

- Uncertainty of future extreme weather events
- You don't know where extreme heat will catch you
- Cost of electricity for increased A/C

Flooding

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- Having financial means to evacuate
- Education

In what ways do you feel unprepared?

- More atmospheric storms
- How to deal with sea level rise?
- How do we evacuate and relocate?
- Lack of maintenance of streams and trees (by gov't)
- Sewer impacts everyone
- Electricity outages without generators to power essential equipment
- Need both means and notification to evacuate
- Transportation impacted by flooding
- Flood zone information is outdated or inaccurate (and doesn't include climate-related impacts)

Drought

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

In what ways do you feel unprepared?

- How can you prepare?
- Too much waiting before taking action (e.g., Utah, Arizona)
- Individual actions don't feel big enough to make a difference

Breakout Group 3

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Wildfire

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- Redwood forest in back yard that keeps temperatures cooler and don't burn easily.
- Sealed house, safe place to breathe. N95 masks when outside.
- Air filtration system in house. Work has limited air filtration.
- Near high fire area. Fire inspector said vegetation well-manage (good way to protect house)
- N95 masks are great
- Could bike out in event of exacution

In what ways do you feel unprepared?

- Traffic will be extremely congested, could get stuck
- Water pressure is terrible in unincorporated areas
- Dead trees. Need some sort of removal service. No tree board to raise issues too
- Urban fires because of encampment activity

Extreme Heat

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- House is protected from this.
- More cooling centers would be helpful
- Average citizen cant afford or take the time to install HVAC in houses (need more support from county)
- No insulation buffer in roof (no attics)

In what ways do you feel unprepared?

- Grid reliability could be issue
- Very little tree cover. This will increase heat related deaths
- Took too long to open cooling center during extreme heat in 2022
- Not enough outreach from county about how to be prepared for extreme heat events
- No HVAC in house
- When hot, there's often fire so you cant go outside

Flooding

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- Elevated houses are fine
- Urban areas seem better protected
- San Lorezno Creek didn't flood significantly during January storms

In what ways do you feel unprepared?

- Folks near creeks having issues. No planning from flood control (need solutions)
- Flood control didn't come to Cherryland Community Association
- Flood control never came back to community to ask for increase in funding (not sure they are adequately funded)
- Not much protection fro San Loreznc Creek should flood
- Flood control sometimes exacerbates creek floodin (conducted cleanup that removed plant life along creek banks)

Drought

How prepared do you feel to deal with the impacts of this climate hazard?

What makes you feel prepared?

- Rain barrel collection Low-flow appliances
- Backup water in household
- Please dont cut down trees Ruby Meadow (moratorium on Eden Housing project)

In what ways do you feel unprepared?

- Long term problem (need planning)
- Tri-Valley is reliant on groundwater (PFAS concerns)
- removing more trees to build housing
- More housing in arid environment drains water sources
- Will impact us in so many ways - Trout could be impacted in San Lorenzo creek system
- At mercy of powers that be. Community members are reliant upon goverment

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Please place a blue dot on the scale in a place that best corresponds to how prepared you feel to deal with the climate hazard.

Please fill out the sticky notes below to share why you feel prepared and/or unprepared to deal with the climate hazard, and place them under the respective question.

Breakout Group 5

Por favor coloque un punto azul en la escala donde mejor usted se sienta preparado para hacer frente al peligro climático.

Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Por favor coloque un punto azul en la escala donde mejor usted se sienta preparado para hacer frente al peligro climático.

Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Incendios forestales (Wildfire)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)

No preparado/a (Not Prepared) Algo preparado/a (Somewhat Prepared) Totalmente preparado/a (Fully Prepared)

¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

What I've learned in workshops has helped me feel prepared

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

It hasn't happened yet, so I haven't put anything into practice

When people have experienced these hazards, they're more prepared. I would like to be prepared

More public workshops-- I've done workshops on earthquakes, but I want to become versed in other disasters

I work as a community volunteer and workshops would help me transmit this knowledge to community

Calor extremo (Extreme Heat)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)

No preparado/a (Not Prepared) Algo preparado/a (Somewhat Prepared) Totalmente preparado/a (Fully Prepared)

¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

Workshops to help prepare, reading the news, about how to take care of things in extreme heat, what to do, what not to do

Heat and earthquakes are disasters we hear about in the news

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

People who don't have AC or access to an air conditioned space - I don't have that issue

Some people in community have issues with no AC

Por favor coloque un punto azul en la escala donde mejor usted se sienta preparado para hacer frente al peligro climático.

Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Por favor coloque un punto azul en la escala donde mejor usted se sienta preparado para hacer frente al peligro climático.

Por favor llene en las notas adhesivas que aparecen a continuación de como si o no se siente preparado para hacer frente al peligro climático, y colóquelas debajo de su pregunta respectiva.

Which of these 5 (4 climate hazards & earthquake) worries you the most? Earthquakes, because I live in California. They're all destructive but earthquakes really engender panic

Also concerned about earthquakes-- community is very scared about this

I want to take more disaster preparedness workshops to refresh my memory! and bring more people so that they also know.

Combined disaster preparedness workshops (climate flood, fire, drought & earthquake) -- this would be of interest to community because we need to educate ourselves about how to act in these situations

Inundaciones (Flooding)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)

No preparado/a (Not Prepared) Algo preparado/a (Somewhat Prepared) Totalmente preparado/a (Fully Prepared)

¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

As with fires, officials will tell you you need to evacuate, and that's what you need to do

I know the identifying personal documents/ medication/ items that you need to take with you

Grabbing important documents might be the last thing you think about

learned about "go bags" in an earthquake preparation workshop

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

I have knowledge about what to do but I've never had to apply it

I don't know if the go bag would be the same used for flooding

Sequía (Drought)

¿Cuán preparado/a se siente para hacer frente a los efectos de este peligro climático? (How prepared do you feel to deal with the impacts of this climate hazard?)

No preparado/a (Not Prepared) Algo preparado/a (Somewhat Prepared) Totalmente preparado/a (Fully Prepared)

¿Qué le hace sentirse preparado/a? (What makes you feel prepared?)

I know that you need to be prepared with water and food

Some workshops talk about preparing for drought -- the need to conserve water

¿En qué aspectos se siente no preparado/a? (In what ways do you feel unprepared?)

I worry that I wouldn't be prepared for what I would need in this situation

We need more preparation/information because we don't hear about this as much in the news or from local government

Many workshops are only in English. Many people in the Latino community don't know English -- impacts ability to access workshop
